EXPERIENCE

Software Developer, GreeneIS September 2024 - Present

- Developed and deployed automation solutions with Power Apps/Dataverse, reducing manual IT tasks
- Built an AI-powered support bot in n8n that retrieves company knowledge to assist with IT tasks
- Supported an on-site fusion deployment by configuring 30+ workstations, user profiles, and printers

Nanny, Private Family September 2022 - 2024

- Tutored child in math and maintained structured daily routines

PROJECTS

MuscleMate - System Proposal and Specification April - June 2024

- Developed documentation for a fitness-tracking app, including System Proposal, Specification, UML/data flow diagrams, and Balsamiq wireframes.

Go: Lexical and Syntax Analyzer October 2025

- Built a lexical and syntax analyzer for a custom grammar in Go, forming the front end of a compiler to detect and report lexical and syntax errors.

TripSplit October 2025 - June 2026

- Working with a team to build a full-stack trip expense-splitting web and mobile app using agile methods.
